

# DANGERS OF POOR HYGIEN

WitU

Women In  
Technology  
Uganda

## Attention!!!

Poor sanitation is the major cause of diarrhoea which according to World Health Organisation is responsible for 43,000 deaths annually.

Poor hygien mostly in women results into a bad smell and development of ring worms and irritates the body.

Poor hygien is linked to transmission of diseases like cholera, dysentry and typhoid which cause death as well.

It is also linked to several negelected diseases including intestinal worms

**CLEANILINESS IS NOT A LUXURY**
